NIST

COBIT®

VISA

GDPR COMPLIANCE

2

A team of experts will enable your organization to raise awareness and prepare its operations concerning the implementation of a data protection regulatory framework, according to the GDPR regulation. Our approach covers multi-areas assessments and thorough reviews to depict how an organization can treat personal data in a much more effective manner.

SECURITY AWARENESS

3

The human factor is one of the most important elements that enables an organization to function and further improve its operations. Thus, our trained professionals aim into raising the information security awareness of all personnel, with targeted training sessions, that are tailor-made to the organization's needs.

CLOUD SECURITY

4

Residing an infrastructure on a cloud environment can expand the current threat landscape that an organization faces. Our effective methodology, supported by our team of experts, can provide assistance into reviewing whether a cloud infrastructure meets the security criteria as proposed by common best practices and standards, and build the roadmap to compliance.

OUR TEAM OF PROFESSIONALS

The Team of the IT Risk Services, consists of certified and experienced Information Security Professionals, possessing an extensive list of industry certifications (incl. OSCP, CISSP, CISA, OSWP) and has a strong background in different industry sectors, including Banking / Finance / Insurance / Shipping and others.

PROVEN METHODOLOGY

A well-defined, complete, structured and holistic process is followed based on the industry's best practices.
